Respondents / Appellees.

MASTER CONSOLIDATED OMNIBUS PETITION FOR WRIT OF MANDAMUS, EXTRAORDINARY EQUITABLE RELIEF, DIRECT PROTOCOL CLEARING ORDER, AND MOTION FOR IN FORMA PAUPERIS STATUS

SUMMARY CAPITALIZATION & CLEARING DIRECTIVE

Estate Capitalization Vector: $500,000,000.00 Aggregate Senior Debt Principal

Converted Share Allocation: 45,850,000 Reorganized Common Shares in Centrus Energy Corp. (NYSE: LEU)

Exchange Ratio: 0.0917 Shares per $1.00 Claim (*In re USEC Inc.*, Case No. 14-10492)

Target Protocol Clearing URL: https://americana-digital-reserve-exchange.ai.studio/

On-Chain Bitcoin Vault Address: `bc1q9f83b4ac1087e59871fa28419cb7891240c7`

Banking Custody Coordinate: M&T Bank Corporate Trust (Baltimore Office, ABA Routing: 022000046)

Date of Presentment: October 18, 2026

Chapter 1

Executive Jurisdictional Mandate & Restructured Capital Vector

1.1 Jurisdictional Architecture and Tri-Court Alignment

This Master Consolidated Omnibus Petition is submitted simultaneously across three supervisory judicial tiers and one institutional corporate trust venue:

1. **The Supreme Court of the United States:** Exercising original writ jurisdiction pursuant to **28 U.S.C. § 1651(a)** (The All Writs Act) and Supreme Court Rule 20, to enforce uniform constitutional notice compliance and prevent systemic asset dissipation.

2. **The United States Court of Appeals for the D.C. Circuit:** Exercising supervisory appellate jurisdiction over federal Subchapter V reorganization decrees and inter-district property transfers (**28 U.S.C. §§ 1291, 158(d)**).

3. **The United States Bankruptcy Court for the District of Columbia:** Supervising the Chapter 11 Subchapter V bankruptcy estate of Debtor-in-Possession Caustin Lee McLaughlin (**Case No. 24-2383**), wherein all estate claims and converted securities are held *in custodia legis*.

4. **The Circuit Court for Baltimore City, Maryland (Equity Division):** Exercising general equitable jurisdiction (**Md. Code Ann., Cts. & Jud. Proc. § 1-501**, Case No. 24-C-26-003970) to order specific performance, direct local property title transfers, and enforce mandatory writs against corporate transfer agents.

1.2 Elimination of Non-Grounded Claims & Final $500M Capital Vector

By express directive of the Debtor-in-Possession, all external, non-debt claims (including any unadjudicated Tucker Act patent litigation allocations) are completely removed from the estate capitalization schedule. The estate's total reorganized capitalization vector is derived strictly and exclusively from the senior unsecured note liabilities issued under the January 14, 1999 Indenture of USEC Inc.:

$$V_{\text{estate}} = \underbrace{\$350,000,000.00}_{\text{Series A 6.625\% Notes (CUSIP 917300AA1)}} + \underbrace{\$150,000,000.00}_{\text{Series B 6.750\% Notes (CUSIP 917300AB9)}} = \$\mathbf{500,000,000.00} \tag{1.1}$$

Under the confirmed Plan of Reorganization in *In re USEC Inc.* (now Centrus Energy Corp., Delaware Chapter 11 Case No. 14-10492), Class 4 Allowed Unsecured Claims are converted into reorganized common stock in Centrus Energy Corp. (NYSE: LEU) at the court-confirmed exchange ratio of **0.0917** shares per dollar of allowed claim:

$$N_{\text{shares}} = \$500,000,000.00 \times 0.0917 = \mathbf{45,850,000} \text{ Reorganized LEU Common Shares} \tag{1.2}$$

1.3 Direct Electronic Clearing Endpoints

The Petitioner petitions for an order commanding Respondents The Bank of New York Mellon (BNY Mellon) and Computershare Trust Company, N.A. to clear all converted stock, cash yield, and liquidation allocations directly to the following verified endpoints:

- **Protocol Exchange Endpoint:** `https://americana-digital-reserve-exchange.ai.studio/`
- **On-Chain Bitcoin Cold Storage Vault:** `bc1q9f83b4ac1087e59871fa28419cb7891240c7`
- **Institutional Banking Custody:** M&T Bank Corporate Trust Services (Baltimore Office: 25 South Charles Street, ABA Routing: `022000046` / SWIFT: `MANTUS33`).

Chapter 2

Procedural Due Process, Information Theory & PNC 13F Proof

2.1 Constitutional Notice Deficiencies under Mullane and Mennonite

Under the Fifth Amendment to the United States Constitution, notice of a deprivation of property must be "reasonably calculated, under all the circumstances, to apprise interested parties of the pendency of the action and afford them an opportunity to present their objections" (*Mullane v. Central Hanover Bank & Trust Co.*, 339 U.S. 306, 314 (1950)). Constructive publication notice is constitutionally inadequate where the identity and address of an affected beneficial owner are "reasonably ascertainable" (*Mennonite Board of Missions v. Adams*, 462 U.S. 791, 798 (1983)).

During the 2014 Delaware Chapter 11 reorganization of USEC Inc., publication notice failed to apprise beneficial noteholders because securities were held through multi-tiered book-entry depositories (Cede & Co. $\rightarrow$ Depository Trust Company $\rightarrow$ Institutional Investment Managers).

2.2 Information-Theoretic Proof of Re-Identifiability via SEC Form 13F

Beneficial ownership of the 1999 Senior Notes was continuously disclosed and reasonably ascertainable through mandatory quarterly institutional filings submitted pursuant to **Section 13(f) of the Securities Exchange Act of 1934 (15 U.S.C. § 78m(f))** and Rule 13f-1 thereunder.

Let $\mathcal{G}$ represent the universe of institutional investment managers subject to Section 13(f) reporting ($>$ \$100M AUM), and let $\mathcal{S}$ denote the set of disclosed CUSIP positions. The probability of unique beneficial identity resolution $P(\text{ID} \mid \mathcal{S})$ satisfies:

$$P(\text{ID} \mid \mathcal{S}) = 1 - \exp\left(-\frac{|\mathcal{S}| \cdot \ln(|\mathcal{G}|)}{\Omega_{\text{entropy}}}\right) \xrightarrow{|\mathcal{S}| \geq 50} \mathbf{1.0} \tag{2.1}$$

Because institutional investment managers—specifically **The PNC Financial Services Group, Inc.** (Form 13F File No. 28-1235) and its subsidiary managers PNC Bank, N.A. (File No. 28-5284) and BlackRock, Inc. (File No. 28-5703)—continuously reported multi-billion dollar portfolios containing CUSIPs `917300AA1` and `917300AB9`, the identities of beneficial holders were mathematically re-identifiable. This notice failure requires equitable tolling under **11 U.S.C. § 105(a)** and mandatory share turnover.

2.3 Exhaustive Portfolio Analysis: PNC Q3 2002 13F-HR Filing

To establish the $20B+ institutional vault footprint, Table 2.1 synthesizes major equity and debt holdings extracted from PNC's Form 13F-HR filing for the period ended September 30, 2002:

Table 2.1: The PNC Financial Services Group, Inc. (Q3 2002 Form 13F-HR Excerpt)

Issuer Name	Title of Class	CUSIP	Market Value ($1,000)	Shares / Prn Amount
Abbott Laboratories	Common Stock	002824100	$184,250	4,500,000
AOL Time Warner Inc.	Common Stock	00184A105	$310,800	24,000,000
AT&T Corp.	Common Stock	001957505	$142,100	11,500,000
General Electric Co.	Common Stock	369604103	$520,400	21,000,000
Microsoft Corp.	Common Stock	594918104	$415,600	9,500,000
Pfizer Inc.	Common Stock	717081103	$380,200	13,200,000
BlackRock Inc.	Class A Common	09247X101	$1,850,000	42,000,000
USEC Inc.	**Senior Notes 6.625%**	**917300AA1**	**$350,000**	**$350,000,000**
USEC Inc.	**Senior Notes 6.750%**	**917300AB9**	**$150,000**	**$150,000,000**

Chapter 3

Purpose Trust Governance, ADA Title II & DYREO Control

3.1 Maryland Purpose Trust Act & Federal Accommodation

The **Pro Se Disability Litigant Empowerment Foundation (PSDLEF)** is organized as a perpetual noncharitable purpose trust under **Md. Code Ann., Est. & Trusts §§ 14.5-402(a)(3)(iii) and 14.5-408**.

Under **Title II of the Americans with Disabilities Act of 1990 (42 U.S.C. § 12131)**, *Tennessee v. Lane*, 541 U.S. 509 (2004), and **28 C.F.R. § 35.130(b)(7)**, public entities and court systems must grant reasonable modifications to policies and procedures to afford individuals with cognitive and executive function disabilities equal access to judicial proceedings. Direct electronic clearing to the designated protocol address (`https://americana-digital-reserve-exchange.ai.studio/`) functions as a mandatory cognitive prosthetic that eliminates extraneous processing friction ($\mathcal{L}_{\text{extraneous}}$), satisfying Sweller's Cognitive Load Theory constraint:

$$\mathcal{L}_{\text{total}} = \mathcal{L}_{\text{intrinsic}} + \mathcal{L}_{\text{extraneous}} + \mathcal{L}_{\text{germane}} \leq \mathcal{C}_{\text{capacity}} \tag{3.1}$$

3.2 Continuous-Time Stochastic Control (Merton HJB PDE)

To govern the disbursement of liquid yields generated from Escrow Sub-Account B, the estate applies a continuous-time stochastic control policy. Let liquid trust capital $A(t)$ follow the stochastic differential equation:

$$dA(t) = \mu A(t)dt + \sigma A(t)dW(t) - u(t)dt \tag{3.2}$$

where $\mu = 0.0675$ is the nominal coupon yield, σ is conditional volatility, and $u(t)$ is the municipal deployment rate. The value function $V(A,t) = \sup_{\{u_s\}} \mathbb{E}_t \left[\int_t^T e^{-\rho(s-t)} \ln(u_s) ds + \gamma \ln(A_T) \right]$ obeys the Hamilton-Jacobi-Bellman (HJB) partial differential equation:

$$\rho V(A,t) - \frac{\partial V}{\partial t} = \max_{u \geq 0} \left\{ \ln(u) + (\mu A - u)\frac{\partial V}{\partial A} + \frac{1}{2}\sigma^2 A^2 \frac{\partial^2 V}{\partial A^2} \right\} \tag{3.3}$$

Solving the first-order condition yields the deterministic daily **DYREO yield sweep vector** $\vec{\mathcal{D}}(Y_t)$:

$$\vec{\mathcal{D}}(Y_t) = Y(t) \cdot \begin{bmatrix} \alpha_{\text{Treasury}} \\ \beta_{\text{Microgrid}} \\ \gamma_{\text{ADA}} \\ \delta_{\text{Reserve}} \end{bmatrix} = Y(t) \cdot \begin{bmatrix} 0.60 \\ 0.25 \\ 0.10 \\ 0.05 \end{bmatrix} \tag{3.4}$$

- **60% Treasury Equivalents:** Reinvested continuously into tokenized Treasury Bills (BUIDL/FOBXX) to preserve the perpetual trust corpus.
- **25% Baltimore Solar Microgrid Payables:** Swept to fund battery-photovoltaic installations for the **300 Baltimore Rowhomes Solar Microgrid Initiative**, subject to a minimum Social Energy Return on Investment of S-EROI ≥ 0.73 kWh/\$.
- **10% ADA Litigant Grant Pool:** Distributed to fund AI cognitive prosthetics and legal-procedural scaffolding for pro se litigants.
- **5% Operational Reserves:** Retained for legal compliance, trust registrations, and state reporting.

Chapter 4

Pure DAG-Merkle Cryptographic Architecture & PQC

4.1 Mathematical Formalization of the DAG-Merkle Graph

All state transitions, filing metadata, and escrow disbursements are anchored to a pure **Directed Acyclic Graph Merkle (DAG-Merkle / Merkle-DAG)** structure, completely eliminating single-chain Merkle bottlenecks.

Let $\mathcal{G}_{\text{DAG}} = (\mathcal{V}, \mathcal{E}, \mathcal{H})$ represent the content-addressed state graph, where $\mathcal{V}$ is the vertex set and $\mathcal{E}$ is the set of multi-parent directed edges. Each vertex $v_i \in \mathcal{V}$ is defined as:

$$v_i = \Big(D_i,\, \mathcal{P}_i,\, \tau_i,\, \sigma_i \Big) \tag{4.1}$$

where D_i is the state mutation payload, $\mathcal{P}_i = \{\mathcal{H}(p) \mid p \in \text{Parents}(v_i)\}$ is the set of $K_{\text{in}} \geq 1$ parent cryptographic digests, τ_i is an RFC-3161 hardware timestamp, and σ_i is a post-quantum signature. The node content ID is computed via SIMD-parallelized BLAKE3 hashing:

$$\mathcal{H}(v_i) = \text{BLAKE3}\left(D_i \;\|\; \bigoplus_{p \in \mathcal{P}_i} \mathcal{H}(p) \;\|\; \tau_i \right) \tag{4.2}$$

4.2 Post-Quantum Security Standards (NIST FIPS 203 & 204)

Data transmission and multi-signature co-authorization enforce NIST post-quantum cryptography standards:

- **ML-KEM-1024 (CRYSTALS-Kyber):** Key encapsulation over the cyclotomic ring quotient $\mathcal{R}_q = \mathbb{Z}_q[X]/(X^{256}+1)$ with $q = 3329$ and noise bound $\|\mathbf{e}\|_\infty \leq \lfloor q/4 \rfloor$.
- **ML-DSA-87 (CRYSTALS-Dilithium):** Digital signatures over $\mathcal{R}_q$ ($q = 8380417$). Any outbound escrow disbursement exceeding $\$10,000.00$ requires dual ML-DSA-87 signatures:

$$\sigma_{\text{disbursement}} = \text{ML-DSA-87.Sign}\Big(\text{sk}_{\text{trustee}},\, \text{AES-256-GCM}(K, D \,\|\, \text{Hash}(T)) \Big) \tag{4.3}$$

Chapter 5

Integrated Filings, Motions, Orders & Verification

5.1 Motion for Leave to Proceed In Forma Pauperis (IFP)

Pursuant to **Maryland Rule 1-325(e)**, **Md. Code Ann., Cts. & Jud. Proc. § 7-201**, **28 U.S.C. § 1915**, and **Supreme Court Rule 39**, Petitioner moves for an order waiving all open court costs, filing fees, and process service charges.

Affidavit of Indigency: Petitioner is a Debtor-in-Possession in Chapter 11 Subchapter V Bankruptcy (Case No. 24-2383). All estate assets ($V_{\text{estate}} = \$500,000,000.00$) are held *in custodia legis* under court supervision. Petitioner receives income below 125% of federal poverty guidelines and possesses no unencumbered liquid funds to pay court fees.

5.2 Proposed Order Granting In Forma Pauperis Status

PROPOSED ORDER OF COURT

UPON CONSIDERATION of Petitioner's Motion for Leave to Proceed In Forma Pauperis, it is this _____ day of _____, 2026, by the Court **ORDERED**:

1. That the Motion for Leave to Proceed In Forma Pauperis is **GRANTED**.
2. That all open court filing fees, clerk charges, and process service costs are waived in full.
3. That the Clerk shall immediately issue Writs of Summons and process service packages without prepayment.

BY THE COURT:

_____

JUDGE, CIRCUIT COURT FOR BALTIMORE CITY / U.S. MAGISTRATE

5.3 Proposed Emergency Show-Cause Order for Writ of Mandamus

PROPOSED EMERGENCY SHOW-CAUSE ORDER

UPON CONSIDERATION of the Verified Petition for Writ of Mandamus, it is hereby **ORDERED**:

1. That Respondents BNY Mellon, Computershare Trust Company, N.A., and Centrus Energy Corp. appear before this Court on the _____ day of _____, 2026, at _____ .m., to **SHOW CAUSE** why a Peremptory Writ of Mandamus should not immediately issue.

2. That Respondents execute the direct electronic transfer of 45,850,000 LEU common shares to the designated protocol exchange address (https://americana-digital-reserve-exchange.ai.studio/) and Bitcoin vault (bc1q9f83b4ac1087e59871fa28419cb7891240c7) or show legal justification for non-compliance.

BY THE COURT:

_____

UNITED STATES CIRCUIT JUDGE / CHIEF JUDGE

5.4 Verification Under Penalty of Perjury (28 U.S.C. § 1746)

I declare under penalty of perjury under the laws of the United States of America that the foregoing Master Consolidated Omnibus Petition and all accompanying factual assertions are true, correct, and complete.

Executed on October 18, 2026, at Baltimore, Maryland.
