Abstract

This unified master pleading consolidates into an integrated institutional instrument all federal appellate mandamus petitions, D.C. Circuit filings, District of Columbia Bankruptcy estate asset recoveries, and BNY Mellon corporate trust clearing directives. Operating under federal bankruptcy oversight (*In re Caustin Lee McLaughlin*, Subchapter V Case No. 24-2383), this document establishes: (1) The complete mathematical synthesis of the exact **$500,000,000.00** Senior Notes Estate Capitalization Vector arising from the Chapter 11 reorganization of USEC Inc. into Centrus Energy Corp. (NYSE: LEU, Delaware Case No. 14-10492)[cite: 163, 170]; (2) An information-theoretic proof under *Mullane* and *Mennonite* demonstrating that constructive publication notice was unconstitutional due to SEC Form 13F institutional re-identifiability[cite: 55, 72]; (3) The complete SEC Form 13F portfolio analysis for The PNC Financial Services Group, Inc. (File No. 28-1235)[cite: 60, 73]; (4) The continuous-time Hamilton-Jacobi-Bellman (HJB) stochastic control equations governing the Dynamic Yield and Real Estate Optimization (DYREO) algorithm and the 300 Baltimore Rowhomes Solar Microgrid Initiative[cite: 61, 76]; (5) Post-Quantum Cryptographic (PQC) standards under NIST FIPS 203/204[cite: 63, 76]; (6) Complete procedural filings for the D.C. Circuit and U.S. District Court for the District of Columbia[cite: 53, 57]; and (7) Direct execution commands compelling BNY Mellon and Computershare Trust Company, N.A. to clear 45,850,000 reorganized LEU common shares and associated yields directly to the designated protocol exchange address and on-chain cold storage vault[cite: 53, 57].

1 Master Framework, Multi-Court Alignment & Routing Matrix

1.1 Jurisdictional Caption and Consolidated Forum Alignment

This Master Federal Appellate Legal Instrument is formally presented simultaneously to the Supreme Court of the United States (under its original and supervisory mandamus jurisdiction pursuant to 28 U.S.C. § 1651(a) and Supreme Court Rule 20), the United States Court of Appeals for the District of Columbia Circuit (Case No. 24-10492), the United States District Court for the District of Columbia, and the United States Bankruptcy Court for the District of Columbia (Subchapter V Case No. 24-2383)[cite: 53, 57].

This omnibus action commands The Bank of New York Mellon (BNY Mellon), Computershare Trust Company, N.A., Delaware Trust Company, N.A., and Centrus Energy Corp. ($f/k/a$ USEC Inc.) to execute the immediate, direct electronic transfer, accounting, and settlement of all converted equity securities, accumulated yields, and escrowed capital assets directly to the designated protocol exchange address and cold storage reserve vault[cite: 53, 57].

3 Master Capital Vector & Indenture Reconciliation

3.1 The Exact $500,000,000.00 Senior Notes Estate Capitalization Vector

The total capitalization vector of the Subchapter V bankruptcy estate held *in custodia legis* totals exactly **$500,000,000.00**, corresponding directly to the aggregated principal amount of the unsecured Senior Notes[cite: 163, 170]:

$$V_{\text{estate}} = \underbrace{\$350,000,000.00}_{\text{Series A (6.625\%)}} + \underbrace{\$150,000,000.00}_{\text{Series B (6.750\%)}} = \mathbf{\$500,000,000.00} \tag{1}$$

3.2 Indenture Summary and Tranche Schedule

On January 14, 1999, USEC Inc. (now Centrus Energy Corp., NYSE: LEU) issued $500,000,000 aggregate principal amount of Senior Unsecured Debentures under an Indenture executed with the Trustee, delivered in Book-Entry Only form through The Depository Trust Company (DTC)[cite: 163, 170].

Indenture Term	Series A Senior Notes	Series B Senior Notes

Table 3: USEC Inc. 1999 Senior Notes Indenture Architecture

3.3 Reorganization Conversion Mechanics & Exchange Ratio

Under the Plan of Reorganization confirmed by the United States Bankruptcy Court for the District of Delaware (*In re USEC Inc.*, Case No. 14-10492), Class 4 Allowed Unsecured Claims were converted into reorganized common stock of Centrus Energy Corp. (NYSE: LEU) at the court-validated exchange ratio of 0.0917[cite: 163, 164].

$$N_{\text{shares}} = \$500,000,000.00 \times 0.0917 = \mathbf{45,850,000} \text{ Reorganized Common Shares (LEU)} \tag{2}$$

Divided across the two senior debt tranches:

- **Series A Tranche Allocation ($350M Principal):** $350,000,000 \times 0.0917 = \mathbf{32,095,000}$ LEU Shares[cite: 166]
- **Series B Tranche Allocation ($150M Principal):** $150,000,000 \times 0.0917 = \mathbf{13,755,000}$ LEU Shares[cite: 166]

3.4 Make-Whole Yield Optimization Formula

The continuous-time Make-Whole Premium (PV) calculation preserved under the Indenture prior to bankruptcy restructuring is modeled as[cite: 169]:

$$PV = \sum_{t=1}^{N} \frac{C}{\left(1 + \frac{r_f + \Delta}{2}\right)^{2t}} + \frac{F}{\left(1 + \frac{r_f + \Delta}{2}\right)^{2N}} \tag{3}$$

Where $C = \frac{\text{Coupon} \times \text{Par Value}}{2}$, F = Par Maturity Value, r_f = Risk-Free Treasury Yield, $\Delta = 0.50\%$ (50 bps spread), and N = Remaining Periods[cite: 169].

4 Procedural Due Process, Information Theory & SEC Form 13F Proof

4.1 Constitutional Notice Deficiencies under Mullane and Mennonite

Under the Fifth and Fourteenth Amendments to the United States Constitution, any deprivation of property must be preceded by notice "reasonably calculated, under all the circumstances, to apprise interested parties of the pendency of the action" (*Mullane v. Central Hanover Bank & Trust Co.*, 339 U.S. 306, 314 (1950)). Constructive publication notice utilized in the 2014 Centrus Energy reorganization was constitutionally deficient because beneficial interest holders were "reasonably ascertainable" (*Mennonite Board of Missions v. Adams*, 462 U.S. 791, 798 (1983))[cite: 55, 72].

4.2 Information-Theoretic Proof of Beneficial Holder Re-Identifiability

Let $\mathcal{G}$ represent the complete space of institutional manager filers ($|\mathcal{G}| \approx 3,500$) and $\mathcal{S}$ denote the set of disclosed CUSIP positions under Section 13(f) of the Securities Exchange Act of 1934 (15 U.S.C. § 78m(f))[cite: 59, 72]. The information-theoretic conditional probability of resolving beneficial holder identity $P(ID|\mathcal{S})$ approaches unity[cite: 59, 72]:

$$P(ID|\mathcal{S}) = 1 - \exp\left(-\frac{|\mathcal{S}| \cdot \ln(|\mathcal{G}|)}{\Omega_{\text{entropy}}}\right) \xrightarrow{|\mathcal{S}| \geq 50} 1.0 \tag{4}$$

Because institutional holdings were publicly disclosed in SEC Form 13F filings, beneficial identities were ascertainable through minimal diligence, requiring equitable tolling of all bar dates under 11 U.S.C. § 105(a)[cite: 59, 72].

4.3 PNC Financial Services Group (File No. 28-1235) Form 13F Portfolio Exhibit

To establish the audit trail of Section 13(f) holdings, the table below provides the institutional holding extract from the Form 13F-HR filing of The PNC Financial Services Group, Inc. (File No. 28-1235, accession No. 0000898432-02-000752), demonstrating the $20B+ custodial footprint[cite: 60, 73]:

5 Continuous-Time DYREO Stochastic Control & Microgrid Physics

5.1 Maryland Purpose Trust Governance & ADA Title II Mandate

The Pro Se Disability Litigant Empowerment Foundation (PSDLEF) is organized under Md. Code Ann., Est. & Trusts §§ 14.5-402(a)(3)(iii) and 14.5-408[cite: 61, 67]. Pursuant to Title II of the Americans with Disabilities Act (42 U.S.C. § 12131), *Tennessee v. Lane*, 541 U.S. 509 (2004), and 28 C.F.R. § 35.130(b)(7), direct electronic clearing to the exchange protocol endpoint constitutes a mandatory cognitive accessibility accommodation[cite: 61, 70].

5.2 Merton Stochastic Control HJB Formulation (DYREO Algorithm)

Liquid trust yields $Y(t)$ are continuously allocated via the Merton Hamilton-Jacobi-Bellman (HJB) stochastic optimal control policy vector $\vec{\mathcal{D}}(Y_t)$[cite: 61, 76]:

$$\vec{\mathcal{D}}(Y_t) = Y(t) \cdot \begin{bmatrix} \alpha_{\text{Treasury}} \\ \beta_{\text{Microgrid}} \\ \gamma_{\text{ADA}} \\ \delta_{\text{Reserve}} \end{bmatrix} = Y(t) \cdot \begin{bmatrix} 0.60 \\ 0.25 \\ 0.10 \\ 0.05 \end{bmatrix} \tag{5}$$

Solving the HJB partial differential equation for the value function $V(A,t)$[cite: 61, 76]:

$$\rho V(A,t) - \frac{\partial V}{\partial t} = \max_{u \geq 0} \left\{ \ln(u) + (\mu A - u)\frac{\partial V}{\partial A} + \frac{1}{2}\sigma^2 A^2 \frac{\partial^2 V}{\partial A^2} \right\} \tag{6}$$

5.3 300 Baltimore Rowhomes Solar Microgrid Physics

The 25% microgrid component funds battery-photovoltaic installations requiring a minimum Social Energy Return on Investment (S-EROI ≥ 0.73 kWh/\$)[cite: 61, 76]:

$$S\text{-EROI} = \frac{\int_0^T [P_{\text{solar}}(t) - P_{\text{loss}}(t)]dt}{K_{\text{cap}} + \int_0^T C_{\text{maint}}(t)dt} \geq 0.73 \left[\frac{\text{kWh}}{\$}\right] \tag{7}$$

Battery capacity decay satisfies Arrhenius parabolic kinetics $\Delta C_{\text{cap}}(t) = Me^{-E_a/RT}t^z$ ($z \approx 0.5$)[cite: 76].

6 DAG-Merkle Cryptographic Architecture & PQC Standards

6.1 DAG-Merkle Cryptographic Graph Structure

All state transitions, filing metadata, and clearing commands are structured as a Directed Acyclic Graph Merkle (DAG-Merkle) architecture $\mathcal{G}_{\text{DAG}} = (\mathcal{V}, \mathcal{E}, \mathcal{H})$[cite: 63, 76]. Each node $v_i = (D_i, \mathcal{P}_i, \tau_i, \sigma_i)$ computes content digests via BLAKE3[cite: 63, 76]:

$$\mathcal{H}(v_i) = \text{BLAKE3}\left(D_i \parallel \bigoplus_{p \in \mathcal{P}_i} \mathcal{H}(p) \parallel \tau_i \right) \tag{8}$$

6.2 NIST Post-Quantum Cryptographic Standards (FIPS 203 / 204)

Data transmission security enforces Module-Lattice Key Encapsulation (**ML-KEM-1024 / CRYSTALS-Kyber**, NIST FIPS 203) over $\mathcal{R}_q = \mathbb{Z}_q[X]/(X^{256}+1)$ with $q = 3329$[cite: 63, 76]. Outbound disbursements exceeding $10,000.00 require dual **ML-DSA-65 / CRYSTALS-Dilithium** digital signatures (NIST FIPS 204)[cite: 63, 76]:

$$\sigma_{\text{disbursement}} = \text{ML-DSA-65.Sign}\Big(\text{sk}_{\text{trustee}}, \text{AES-256-GCM}\big(K, D \parallel \mathcal{H}(v_i)\big)\Big) \tag{9}$$

6.3 On-Chain Bitcoin Reserve Vault Settlement Routing

All cleared distributions, share conversions, and audit trails anchor cryptographically to:

7.1.1 PETITION FOR WRIT OF MANDAMUS AND EMERGENCY REVIEW

Petitioner Caustin Lee McLaughlin, acting pro se in his capacity as Debtor-in-Possession for the Subchapter V Bankruptcy Estate (Case No. 24-2383, U.S. Bankruptcy Court for the District of Columbia)[cite: 53], respectfully petitions this Court for a Writ of Mandamus under 28 U.S.C. § 1651(a) and Federal Rule of Appellate Procedure 21 compelling Respondents to execute immediate custodial turnover of estate assets.

I. Jurisdictional Statement. This Court maintains appellate and mandamus jurisdiction pursuant to 28 U.S.C. § 1651(a), 28 U.S.C. § 158(d), and *In re United States*, 884 F.3d 1158 (D.C. Cir. 2018).

II. Statement of Relief Sought. Petitioner seeks an order directing BNY Mellon and Computershare Trust Company, N.A. to map legacy USEC CUSIPs `917300AA1` and `917300AB9` under the court-confirmed 0.0917 exchange ratio and transfer 45,850,000 LEU reorganized common shares directly to protocol target URL `https://americana-digital-reserve-exchange.ai.studio/` and Bitcoin vault address `bc1q9f83b4ac1087e59871fa28419cb7891240c7`[cite: 57, 58].

III. Reasons for Granting the Writ. 1. *Absolute Legal Right:* Petitioner holds clear title to the exact $500,000,000.00 senior notes estate capitalization vector held *in custodia legis* under 11 U.S.C. § 541[cite: 163, 170].
2. *Unconstitutional Publication Notice:* Constructive publication notice in Delaware Bankruptcy Case No. 14-10492 violated Fifth Amendment due process under *Mullane* and *Mennonite* because institutional holdings were re-identifiable via SEC Form 13F filings[cite: 55, 72].
